## 1. Introduction

### 1.1 About the Community Partner

Our journey began in 1970 with the will of Mrs Shakuntala Bhatia. Under the banner of the Asian Women's Welfare Association, Mrs Bhatia and her peers, like Mrs Tambyah and Mrs Kula, identified gaps in the community to help the underserved.

The Association incorporated AWWA Ltd on 7 January 2015, a Singapore company limited by guarantee. In April of the same year, AWWA Ltd took over the operations and activities previously managed by the Association. In 2022, the Association was dissolved, and AWWA continues to address social service gaps as they arise, by being guided by our mission and strategic vision.

## 1.2 Product Description

This table clarifies the intended purpose and scope of the product:

<b>WHY?</b>	Special needs students are often excluded from using toys or face a lack of appropriate ways to express themselves.
<b>WHO?</b>	For Special needs students who are learning to understand cause-and-effect and have fun.
<b>WHAT?</b>	Button with audio recording and playback function, adapted with added 3.5mm male mono audio cable to trigger the power on/off of other toys.
<b>HOW?</b>	This product transforms an off-the-shelf pet button into a durable and responsive device that records, plays back audio, and triggers the power on/off other toys. It allows students to experience and understand the cause-and-effect.

## 1.3 Product Overview and Features

1. Adapted Recorder Button can playback audio.
2. Adapted Recorder Button can record audio.
3. Adapted Recorder Button can trigger other toys to power on/off via the 3.5mm male mono audio jack cable and both trigger and playback audio.

## 2.1 Set Up Instructions

Use the following table for a step-by-step guide to setting up the product:

<b>Setting up</b>	
Open the battery cover and install 2 AAA batteries.	
Press and hold the bottom REC button to start recording audio. It can record up to 30seconds.	
Press the top button to playback the audio.

**Rev: 1.0**

Connect the 3.5mm male mono jack cable to an adapted toy with female mono jack to trigger power on/off.

## 2.2 Maintenance

1. Remove AA batteries if the Adapted Recorder Button is not in use to prevent battery leak and corrosion.
2. If AA battery leaks, please change it
3. The device can be wiped clean with a damp cloth. Do not wash or submerge in water.

## 2.3 Troubleshooting

<b>Problem</b>	<b>Possible Cause</b>	<b>What You Can Try</b>
Adapted Recorder Button not working	Battery drain	Change the battery to see if it works
	Battery spoilt because of leakage	Change the battery to see if it works
	Button spoilt because battery leakage and	Check how bad the corrosion is? 1. If is very bad that it <b>leak to the PCB</b> , please replace the button,

### 3.1 Assembly Guide

Remove the black anti-slip rubber feet and unscrew the 4 screws.

Open up the button. Need push button and cable tie.

Drill a hole on the outer cover of the button.

Insert the 3.5mm male mono audio jack cable through the hole and secure it with a cable tie to prevent it from coming out.

**2025/2026**

**Adapted Recorder Button Product Handbook**

**Rev: 1.0**

Solder the extra push button and add a bit of hot glue to the existing push button.

\*The amount of hot git should minimal so that the extra push button remain movable (rotatable) on the existing push button

Cut the form and the orange cover stand shorter to make space for the extra push button

\*Do remember to keep the 3.5mm male mono audio jack cable inside the hole when you solder.

Install back the part and screw it

Test with a toy see if working

### 4.2. License Statement and Source Availability

The hardware design used in this product is licensed under the CERN Open Hardware Licence Version 2 – Weakly Reciprocal (CERN-OHL-W 2.0) or later.

By distributing this product, we are obligated to make the complete design source available to you.

- Complete Source Availability: The complete design files (Source), including schematics, assembly instructions, and any modifications made by Engineering Good, are available free of charge at a permanent online location:  
<https://github.com/Engineering-Good/T4G-Adapted-Recorder-Button>
- Modification Notice: This version of the Playback Switch design was modified by Engineering Good to include the 3.5mm mono audio jack functionality for triggering other toys. The full, modified source is available at the URL listed above.
- Full License Text: The complete legal text of the CERN Open Hardware Licence Version 2 – Weakly Reciprocal\*\* follows this section.
